Access Express™

The Smart Solution for Enhancing Care Management

Introducing Access Express™, the flagship web-based portal from Health Access Solutions. It transforms and enhances medical care management communications by linking hospitals, physicians and payers. And it improves communications and productivity by offering on-line, real-time solutions to medical management needs.

DESIGNED BY PHYSICIANS FOR PHYSICIANS.

Access Express serves the entire medical community from small physician groups to large IPA's, from MSO's to health plans. It is currently used by more than 25,000 doctors servicing nearly three million patients. Our client users report that using Access Express has resulted in increased revenue, improved staff productivity, accurate and current information and trouble-free workflow. And it's fully HIPAA compliant.

Weigh these benefits

SEAMLESS INTEGRATION.

Access Express integrates decision support, case and care management, P4P quality tracking and HCC optimization. It's seamlessly interoperable with most commonly used third-party applications including EHR, EMR, PHR, Clinical Guidelines and member portals.

STREAMLINED OPERATION, TANGIBLE COST SAVINGS.

Neither start-up costs nor off-site training are required. It is easy to install and quick to learn for physicians and personnel at all levels of care and administration, making adoption fast and seamless. Access Express optimizes all facets of care management communications by replacing the vast majority of paper, faxes and phone calls related to accessing and managing information.

SECURE AND SAFE.

Healthcare professionals cannot take risks concerning patient-provider confidentiality. Access Express provides secure messaging with on-line attachments that is completely HIPAA compliant and safe for provider-to-provider communications. Of course, it meets all state and federal requirements.

REAL TIME ACCESS, IN-NETWORK OPTIMIZATION

Access Express helps you to improve profitability by delivering real-time, on-line answers regarding authorizations, patient eligibility, benefit review and claims tracking. This information is available securely on a self-service basis around the clock, 365 days a year. Optimizing in-network authorizations is simple: set your system to display only in-network physicians and you can rely that referrals will be appropriately routed.

CUSTOMIZABLE AUTHORIZATION CAPABILITY

Access Express has an extensive library of customizable protocols and guidelines to meet your utilization management criteria. Developed by our medical directors, these features enable you to automate authorizations and streamline medical review in the manner that works best for you and your organization.

THE TECHNOLOGY PLATFORM: MICROSOFT GOLD CERTIFIED PARTNER.

The nucleus of Access Express is the Microsoft SQL Server. This next-generation data management platform enables the user to quickly grasp and analyze data and thereby take immediate and effective action. Fueled by this advanced technology, Access Express provides you with secure, customizable applications. Quickly. Easily. Reliably.
